

TRƯƠNG VĨNH THÀNH

FULL-STACK DEVELOPER | AI INTEGRATION

+84 797 200 168 | tvinhthanhsg@gmail.com | github.com/tvinhthanh | Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience building production web and mobile applications across React, Next.js, TypeScript, Node.js, and NestJS. Strong in REST API integration, real-time features with WebSocket, event-driven workflows, Redis caching, responsive UI, and performance optimization. Hands-on with AI integration using OpenAI APIs and Whisper, Python for AI integration/testing, and personal prototyping of automation workflows with n8n. Experienced collaborating across product, QA, design, and backend teams to deliver reliable end-to-end features.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, SCSS
Backend & APIs	Node.js, NestJS, Express.js, Laravel/PHP, C#, RESTful APIs, WebSocket, Webhooks, BullMQ
Data	MongoDB (Mongoose), PostgreSQL, MySQL, Redis
AI & Automation	OpenAI APIs, Whisper, LLM Integration, Prompt Engineering, Python (AI integration/testing), n8n (personal/prototype), RAG Concepts
Testing	Playwright, end-to-end testing, API/integration testing, AI output & integration testing
DevOps	Docker, Jenkins, CI/CD, Ubuntu VPS, Nginx, Cloudflare
Mobile & CMS	React Native, Flutter, Payload CMS, WordPress (Flatsome)
Collaboration	Git, GitHub, Jira, Trello, Figma, Notion

PROFESSIONAL EXPERIENCE

Full-Stack Developer | TGR Fusion

Jun 2025 - Present

- Develop and maintain production web applications using React, Next.js, TypeScript, Node.js, and NestJS across frontend and backend services.
- Design and integrate RESTful APIs, webhooks, and database-driven workflows for authentication, payments, content, and third-party services.
- Build real-time and event-driven features with WebSocket, BullMQ, and Redis to support interactive experiences and asynchronous processing.
- Integrate AI capabilities using OpenAI APIs and Whisper for translation, transcription, and content workflows; validate integrations and outputs through testing and human review.
- Improve frontend performance and discoverability through caching, bundle optimization, SSR/SEO, metadata, sitemaps, and Core Web Vitals work.
- Increase release confidence with Playwright end-to-end testing and support delivery using Docker, Jenkins CI/CD, Ubuntu, Nginx, Cloudflare, and Git workflows.
- Collaborate with product, QA, and design teams; contribute to React Native mobile features when needed.

Frontend Developer | Playouu Company

Jun 2024 - Jun 2026

- Built and maintained production web applications with React, Next.js, TypeScript, Tailwind CSS, and Node.js across social, e-commerce, and interactive product features.
- Integrated RESTful APIs, WebSocket events, caching, and database-driven flows to deliver responsive, real-time user experiences.
- Developed reusable UI systems including dashboards, charts, filters, and data-heavy components with efficient state handling.
- Contributed to Flutter mobile features and Spine animation integration; collaborated with backend, product, design, and QA teams through Git/Jira workflows.

Full-Stack Developer | Freelance

Jan 2023 - Present

- Develop and maintain project-based full-stack web applications using React/Next.js, Node.js/NestJS, Laravel/PHP, C#, and WordPress/CMS.
- Build responsive interfaces, REST APIs, database-driven features, and third-party integrations based on client requirements.
- Work directly with clients to clarify requirements, estimate scope, troubleshoot issues, and deliver maintainable production-ready features.
- Apply technical SEO and performance practices including semantic HTML, metadata, image optimization, caching, lazy loading, and Core Web Vitals improvements.

SELECTED ENGINEERING HIGHLIGHTS

- Delivered payment, wallet, content-access, and account-verification flows using third-party services, webhooks, and reliable transaction-state handling.
- Implemented AI-powered transcription, translation, and content workflows using OpenAI, Whisper, and asynchronous processing.
- Used Python for AI integration/testing and built n8n automation prototypes for personalized and experimental use cases; these were personal/prototype workflows rather than claimed production deployments.
- Worked across frontend, backend, real-time systems, testing, deployment, performance, and SEO to support end-to-end product delivery.

EDUCATION & LANGUAGES

Saigon Technology University Information Technology

Relevant coursework: Full-Stack Web Development; Systems Analysis and Design

Languages

Vietnamese - Native
English - TOEIC 550
