

TRƯƠNG VĨNH THÀNH

FULL-STACK DEVELOPER | AI INTEGRATION

+84 797 200 168 | tvinhthanhsg@gmail.com | Portfolio | github.com/tvinhthanh | Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of overall experience building and maintaining production web and mobile applications, with hands-on ownership across React, Next.js, TypeScript, Node.js, and NestJS. Experienced in RESTful APIs, real-time and event-driven systems with WebSocket and BullMQ, Redis caching, and performance optimization. Hands-on with AI integration using OpenAI APIs and Whisper, plus Python-based AI integration/testing and personal prototyping of automation workflows with n8n. Focused on reliable, maintainable, and user-centric products.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Angular (basic familiarity), Tailwind CSS, Bootstrap, SCSS
Backend & APIs	Node.js, NestJS, Express.js, RESTful APIs, WebSocket, Webhooks, BullMQ
Data	MongoDB (Mongoose), PostgreSQL, MySQL, Redis
AI & Automation	OpenAI APIs, Whisper, LLM Integration, Prompt Engineering, Python (AI integration & testing), AI Workflow Prototyping, n8n (personal/prototype), RAG Concepts
Testing	Playwright, end-to-end testing, API/integration testing, AI output and integration testing
DevOps	Docker, Jenkins, CI/CD, Ubuntu VPS, Nginx, Cloudflare
Mobile & CMS	React Native, Flutter, Payload CMS, WordPress (Flatsome)
Collaboration	Git, GitHub, Jira, Trello, Figma, Notion

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Thang Chin Company

Jul 2025 - Present

- Develop and maintain production web applications using React, Next.js, TypeScript, Node.js, and NestJS across frontend and backend services.
- Design and integrate RESTful APIs, webhooks, and database-driven workflows for authentication, payments, content, and third-party services.
- Build real-time and event-driven features with WebSocket, BullMQ, and Redis to support interactive experiences and asynchronous processing.
- Integrate AI capabilities using OpenAI APIs and Whisper for content, translation, and transcription workflows; validate integrations and outputs through structured testing and human review.
- Improve performance through caching, bundle optimization, SSR/SEO enhancements, and Core Web Vitals work; increase release confidence with Playwright end-to-end testing.
- Support delivery and troubleshooting using Docker, Jenkins CI/CD, Ubuntu, Nginx, Cloudflare, and Git-based workflows.
- Collaborate with product, QA, and design teams; contribute to React Native mobile development when needed.

Frontend Developer | Playouu Company

Jun 2024 - Jul 2025

- Built production web applications with React, Next.js, TypeScript, Tailwind CSS, and Node.js across social, e-commerce, and interactive product features.
- Integrated RESTful APIs, WebSocket events, caching, and database-driven flows to deliver responsive, real-time experiences.
- Developed reusable UI systems including dashboards, charts, filters, and data-heavy components.
- Contributed to Flutter mobile features and interactive experiences using Spine animations.
- Collaborated with backend, product, design, and QA teams through Git- and Jira-based delivery workflows.

Frontend Developer (WordPress / CMS) | Freelance

Jan 2023 - Jun 2024

- Built and customized WordPress websites using the Flatsome theme based on client requirements and design mockups.
- Implemented responsive, pixel-accurate interfaces and collaborated on UI/UX improvements across devices.
- Applied technical SEO and performance practices including semantic HTML, structured data, metadata, image optimization, lazy loading, caching, and Core Web Vitals improvements.

EDUCATION & LANGUAGES

Saigon Technology University Information Technology Relevant coursework: Full-Stack Web Development; Systems Analysis and Design	Languages Vietnamese - Native English - TOEIC 550
--	--

SELECTED ENGINEERING HIGHLIGHTS

- Delivered payment, wallet, and account-verification flows using third-party services, webhooks, and reliable transaction-state handling.
 - Implemented AI-powered transcription, translation, and content workflows with OpenAI, Whisper, and asynchronous jobs.
- Built Python-based AI integration/test scripts and prototyped n8n automation workflows for personalized and experimental use cases.
- Improved search visibility and runtime performance through SSR, metadata and sitemap work, Redis caching, bundle optimization, and Core Web Vitals improvements.
